

Chip Dump

FWT-560

Features:

- Specially designed wire rack: any fall off chips slide along sloped panel and back to the tank. No waste!
- The perforations are of rectangular slots, on which a partition panel can be installed. It enables operator to separate different types of food (such as onion ring), thus you can use the same dumping pan for different types of fried food. No need to buy another piece of dumping pan.
- Regardless of the actual position of the fryer, the accessories of the bagging station such as the rack, sloped panel, the upright glass panel etc can be positioned left or right to fit the position of the fryer.
- The unit comes with heavy duty casters. Two with brakes.
- CE

Accessories:

- Drip tray.
- Dumping pan partition.
- Wire rack.

French Fries Bagging Station

Model	Electrical	Dimension (mm)
FW06	220 V, 1 ph, 1.1 kW	600 (W) x 700 (D) x 1560 (H)
